8-97035455-0 Disc Angle Gear for ISUZU NKR57 model with 43/17 ratio Disc Angle Gear is an important component in the differential of a vehicle, which mainly serves to transmit power and adjust the speed difference between the left and right wheels in order to ensure a smooth running of the vehicle during cornering. Its high quality and precise specifications help to minimise wear and prolong service life, providing reliable operation of the vehicle. Disc angle gears play a key role in a vehicle's drivetrain, affecting its performance and handling.
