8-97032497-0 Axle Shaft T=23 For Isuzu NPR models. It is an important part connecting the differential to the drive wheels and its main function is to transfer power from the differential to the wheels and drive the vehicle. It is fitted with universal joints at both the inner and outer ends and is connected to the gears of the reducer and the inner ring of the wheel bearing by means of splines. This half-shaft can withstand high torque, ensuring stable and reliable power transmission during driving, and enabling Isuzu NPR models to maintain good driving performance under various road conditions.
