8-97075754-0 Oil Sensor (Cylinder Pressure Regulator), for ISUZU NPR71/4HE1 models, it can accurately sense the change of oil pressure in the cylinder and make adjustments in time. It ensures that the engine is supplied with appropriate oil pressure under different working conditions, reducing wear and tear. For example, when the vehicle is climbing a slope with heavy load, it ensures sufficient oil pressure for effective heat dissipation and lubrication.
