8-94395024-0 For ISUZU FVR34 6HK1 models. It precisely adjusts the valve lash to ensure a smooth and efficient engine intake and exhaust process. This optimises combustion, increases power output and reduces fuel consumption. For example, under high-speed driving or heavy load conditions, it ensures stable engine operation and avoids problems such as premature valve wear or poor sealing. It is an important part to maintain good performance of the vehicle and prolong the service life of the engine.
