- 6.Engine Gasket Set & Repair Kits;
7. Belt & Bushing & Bearing & Oil Seal ;
- 8.Body Exterior: Lamps , Fender , Bumper , Grille , Mirror ;

**Mainly engaged in the Japanese car parts. If you need more information, please feel free to contact us!**

8-97161031-0 Air Conditioner Pulley Adjustment Bracket For ISUZU 700P/4HK1 models.

It allows precise adjustment of the position and tension of the air conditioning pulley. It ensures that the belt is at the right tension during operation, avoiding over-loosening leading to slippage and affecting the cooling effect of the air conditioner, and also preventing over-tightening to increase wear and tear. For example, in the vehicle driving, road changes will cause parts vibration, this time the adjustment bracket can stabilize the pulley in time to ensure that the air conditioning system continues to operate stably.
