30213 Rear Wheel Bearing(inner) For ISUZU 700P/4HK1/4HG1/4HF1 models. It supports the rotation of the rear wheels, reduces friction and wear, and makes the rear wheels rotate more smoothly. In the process of vehicle driving, it can withstand various pressures and impacts from the road surface to ensure the precise positioning of the wheels. For example, when the vehicle is traveling on a bumpy road, the bearing can effectively cushion the vibration and ensure driving comfort. Whether accelerating, braking or driving normally, this product provides solid support for the stable operation of the vehicle.
