1-09625484-0 Differential oil seal on ISUZU 700P/FTR15/4HK1/FSR models. It can

effectively prevent the lubricating oil inside the differential from leaking, and at the same time prevent external impurities and dust from entering. It ensures good lubrication and normal operation of the internal parts of the differential and reduces wear and failure. For example, during long-distance driving, the oil seal can continue to play a role in maintaining the stability of the differential. Even in the face of adverse road conditions and changing environments, this seal can guarantee the power transmission of the vehicle.
