8-98036551-0 GENERATOR SUPPORT For ISUZU 700P/4HF1 models. It provides a firm support for the generator and ensures that the generator remains in a stable position while the vehicle is in operation. It effectively reduces the risk of displacement and damage to the generator due to vibration and safeguards its normal operation. For example, under bumpy road conditions, it prevents the generator from shaking, so that the power generation performance is not affected, so that the vehicle's power supply is always stable and reliable, and protects the vehicle's electrical system.
