8-97329780-0 Crankshaft front oil seal For ISUZU 700P/4HK1/4HF1 models. It can effectively prevent engine oil leakage and ensure that the oil in the crankcase is in normal working condition. Keeping the oil sufficient and clean provides good lubrication conditions for normal engine operation. For example, when the vehicle is running at high speed, the oil seal can withstand great pressure and stop the oil from seeping out. This not only reduces oil loss, but also avoids wear and tear on the engine caused by insufficient oil, safeguarding engine performance and life.
