8-98039935-0 High pressure fuel pump oil For ISUZU 700P/4HK1 models. It is the key channel for fuel transmission, able to withstand the huge pressure generated by the high-pressure fuel pump, and deliver fuel to the injector nozzles accurately and correctly. For example, when the vehicle climbs a slope, it ensures sufficient fuel supply to make the vehicle powerful; under adverse road conditions, it still transmits fuel stably to make the engine run smoothly. Its good sealing effectively avoids fuel leakage and ensures the efficiency and safety of the vehicle fuel system, which is an indispensable part for normal vehicle operation.
