8-97387271-0 Worm gear supercharger inlet pipe (iron) for ISUZU 700P/4HK1 models. It is responsible for the precise delivery of coolant to the worm gear supercharger, effectively controlling the operating temperature of the supercharger and preventing overheating and damage. It ensures stable and efficient operation of the supercharger and improves the engine performance when the vehicle is running at high intensity. For example, when driving long distances or climbing slopes with heavy loads, it can keep the supercharger in a good working condition all the time, ensuring strong and stable power output.
