1-41551024-0 Differential planetary gears (10) are suitable for ISUZU 700P/FSR113/FRR3214H models, which can realize different speeds of left and right wheels in cooperation with other parts of the differential during the vehicle driving process. For example, when the vehicle is turning, it ensures that the outer wheels rotate at a higher speed than the inner wheels, making the vehicle steering smoother. In bad road conditions, it can also evenly distribute torque to prevent excessive wheel wear, enhance the vehicle's drivability and stability, and ensure driving safety and comfort.
