What is Cylinder liner?

Cylinder liners are an important part of the engine, used to protect the engine block and ensure that the piston runs smoothly in it.

What is CYLINDER LINER?

Isuzu Cylinder Liner Replacement Procedure:

- 1.Engine Disassembly:** The engine is usually removed from the vehicle and taken apart to access the cylinder block.
- 2.Old Liner Removal:** Special tools are used to carefully pull the old, worn liners out of the engine block.
- 3.Block Preparation:** The engine block bores are meticulously cleaned and measured.
- 4.New Liner Installation:** New liners are gently pressed into place using specialized tools, ensuring a perfect, even fit.
- 5.Engine Reassembly:** The engine is then put back together with new piston rings, gaskets, and seals.
- 6.Testing:** After reinstallation in the vehicle, the engine is tested to ensure everything works correctly and there are no leaks.
