Product Description

FORD EVEREST U375 AIRBAG CLOCK SPRING EB3T-14A664-AB

GZ HAOSH

Email: info@gzhaosh.com

The airbag clock spring is a special rotary electrical connector that allows the steering wheel to turn while maintaining a continuous electrical connection between the steering wheel-mounted electrical components and the vehicle's electrical system. This includes the driver's side airbag, horn, and steering wheel controls. Without it, the wires would twist and break as the steering wheel is turned.
